

## Customized Automobile Spare Parts Assembly 54530-3S000 Ball Joint

### Our Product Introduction

#### Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 54530-3S000
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box, Standard tray
- Delivery Time: 3~30 work days
- Payment Terms: D/P, L/C, T/T

#### Product Specification

- Brand: NABO
- Country Of Origin: CHINA
- Model: 54530-3S000
- Name: Automobile Spare Parts
- Size: Customized
- Type: Ball Joint
- Highlight: Customized Automobile Spare Parts, Automobile Spare Parts Assembly, 54530-3S000

## Product Description

54530-3S000 Ball Joint For Hyundai Kia Tucson Sportage Sonata 54530 3S000

## Product Description:

A ball joint is a crucial component of a vehicle's suspension system. It connects the control arm or wishbone to the steering knuckle, allowing for controlled movement and articulation of the front wheels. The ball joint consists of a spherical bearing enclosed in a metal housing.

## Features:

- 1. Reliable Suspension Connection:** Our ball joint serves as a reliable connection point between the suspension control arms and the steering knuckle. It allows for controlled movement, enabling the suspension to absorb shocks, maintain wheel alignment, and provide a comfortable ride.
- 2. Smooth Articulation:** The ball joint is designed with a spherical bearing and stud assembly, allowing for smooth articulation and rotational movement. This enables the suspension system to respond effectively to road irregularities, ensuring improved handling and stability.
- 3. Load Distribution:** Our ball joint helps distribute the weight and forces exerted on the suspension system evenly. It minimizes stress on individual components, promoting balanced weight distribution and preventing premature wear.
- 4. Enhanced Steering Responsiveness:** By facilitating smooth movement and articulation, our ball joint improves steering responsiveness and accuracy. It allows the suspension and steering systems to work together seamlessly, providing precise control and maneuverability.
- 5. Durability and Longevity:** Our ball joint is constructed with high-quality materials. These components provide excellent strength, durability, and resistance to corrosion, ensuring long-lasting performance in various driving conditions.

## FAQ:

### 1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

### 2. How can we guarantee quality?

Always a pre-production sample before mass production;  
Always final inspection before shipment.

### 3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years  
A large of stock  
Professional export company  
Accept small order  
We can design anything well according to customers' requirment
