

Industry Car Stabilizer Link Custom 55530-3R000 For Hyundai Sonata Tucson IX35

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 55530-3R000
- Minimum Order Quantity: 100 PCS
- Price: \$1.40~\$2.00
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box, Standard tray
- Delivery Time: 3~30 work days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 100000 pcs per month

Product Specification

- Product Name: Car Stabilizer Link
- Car Make: Hyundai Sonata Tucson IX35 For Kia Optima Sportage
- Material: Metal Iron With Rubber
- Quality: 100% Tested
- Warranty: 12 Months
- Highlight: **Industry Car Stabilizer Link,
Car Stabilizer Link Custom, 55530-3R000**

Product Description

55530-3R000 for Hyundai Sonata Tucson IX35 for Kia Optima Sportage 12-15 2WD Rear Stabilizer Bar Link LH+RH
555303R000

Product Description:

A stabilizer link, also called a sway bar link or anti-roll bar link, is an indispensable part of a vehicle's suspension system. Its main purpose is to keep the body from rolling and to improve the steadiness when the vehicle is turning. The stabilizer link connects the sway bar or stabilizer bar to the suspension control arm or strut, which is the component responsible for absorbing the impact and soundness of the vehicle's movement.

The sway bar, which is connected to the stabilizer link, is a U-shaped metal bar that helps avoid body roll. This way, it ensures the correct balance between the left and right side of the vehicle, and this contributes to better handling. Additionally, it acts as a safety element by avoiding situations of understeer, hydroplaning and lifting of the inside wheel.

The combination of the stabilizer link and the sway bar allow the car to handle better, feel more stable and be safer when cornering. Consequently, this makes the vehicle easier and smoother to drive.

Features:

Our stabilizer link offers enhanced stability, precise fit and function, smooth and quiet operation, exceptional durability, and vehicle-specific compatibility.

The stabilizer link connects the sway bar to the suspension control arm or strut, minimizing body roll and improving overall stability when navigating corners or uneven road surfaces. It's designed to exact specifications, guaranteeing a precise fit for your vehicle. It features high-quality ball joints or bushings to ensure smooth articulation and minimize noise and vibrations. Made with premium materials for superior durability, it undergoes rigorous testing to meet or exceed industry standards. We offer a wide range of stabilizer links designed to fit various vehicle makes and models.

Support and Services:

Car Stabilizer Link Technical Support and Service

Car Stabilizer Link provides technical support and service for our customers. Our team of experts is available to answer any technical questions you may have. We offer a range of services to keep your vehicle running smoothly, including:

Diagnostics and troubleshooting

Software and hardware updates

Remote access to vehicle data

On-site repairs and maintenance

Replacement parts and accessories

If you have any questions or need assistance, please contact us at info@carstabilizerlink.com.

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;
Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
