17127619684 Radiator Cooling system coolant water hose pipe Upper For BMW F10 F11

Our Product Introduction

For more products please visit us on automobile-sparepart.com

Basic Information

- Place of Origin: CHINA
- Brand Name: NABO
- Certification: TS16949
- Model Number: 17127619684
- Minimum Order Quantity: 10 PCS
- Packaging Details: poly bag or air bubble bag, any boxes with customers' label, Corrugated box , Standard tray
- Delivery Time: 3-30 days
- Payment Terms: D/P, L/C, T/T
- Supply Ability: 50000 pcs per month

Product Specification

- Application: Radiator Water Pipe
- Brand: OEM
- Pressure Rating: 1.6MPa
- Temperature Rating: 150
- Size: Standard

Product Description

Product Description:

Introducing our premium Water Coolant Hose Water Pipe - a critical component that is specifically designed to transport coolant fluid to your vehicle's cooling system. Our water coolant hose water pipe is engineered with precision to ensure optimal performance and consistent cooling. This top-quality hose water pipe is the perfect solution for anyone who wants reliable and efficient cooling for their vehicle.

With its advanced construction, our water coolant hose water pipe is built to last. We use only the highest quality materials to ensure that our product is durable in all types of conditions. It's no secret that high temperatures can cause damage to your engine if not properly regulated, and that's why our product is so important. Our hose water pipe ensures that your coolant fluid is delivered consistently and reliably to keep your engine running smoothly.

Our water coolant hose water pipe is easy to install and maintain, making it the perfect choice for car enthusiasts and professionals alike. With its precision engineering, you can be sure that you're getting the best performance and reliability from our product. In addition, our water coolant hose water pipe is affordably priced so that everyone can enjoy the benefits of optimal cooling for their vehicle.

Don't take any chances with your vehicle's cooling system. Invest in our high-quality Water Coolant Hose Water Pipe today and enjoy the peace of mind that comes with knowing that your engine is running at its best!

Invest in Your Vehicle:

Don't take any chances with your vehicle's cooling system. Invest in our high-quality Water Coolant Hose Water Pipe today and enjoy the peace of mind that comes with knowing that your engine is running at its best!

Features:

Superior Construction

At our company, we take pride in crafting our water coolant hose water pipe from high-quality materials such as reinforced rubber or silicone. Our materials are resistant to heat, pressure, and coolant chemicals, ensuring strength, flexibility, and long-lasting performance even in demanding operating conditions.

Efficient Coolant Flow

The water coolant hose water pipe is responsible for efficient coolant fluid circulation between the engine, radiator, heater core, and other cooling system components. By transferring heat away from the engine, the water coolant hose water pipe ensures proper engine temperature regulation, preventing overheating.

Leak and Burst Resistance

Our water coolant hose water pipe is designed to withstand high pressures and temperature fluctuations, minimizing the risk of leaks or bursts. The hose pipe features reinforced layers and sturdy connectors, providing a secure and reliable connection, enhancing the overall integrity of the cooling system.

Temperature and Chemical Resistance

We engineered our water coolant hose water pipe to withstand extreme temperature variations and exposure to coolant chemicals. The hose pipe resists deterioration, swelling, and cracking, ensuring consistent coolant flow and preventing coolant contamination, making it reliable for long-term use.

Easy Installation

Our water coolant hose water pipe is designed for straightforward installation, fitting perfectly as a direct replacement for your vehicle's original water pipe. This means that it is suitable for both professional mechanics and DIY enthusiasts, ensuring compatibility and a hassle-free installation process.

Quality Assurance

To ensure our customers receive only the best quality, we carry out rigorous testing and quality control measures on the water coolant hose water pipe before they leave our facility. We partner with trusted suppliers who prioritize quality and performance guaranteeing that you receive a reliable and durable product.

Technical Parameters:

Application	Radiator Water Pipe
-------------	---------------------

Temperature Rating	150
Size	Standard
Brand	OEM
Pressure Rating	1.6MPa

Support and Services:

The Radiator Water Pipe product technical support and services include:

Expert assistance with installation and troubleshooting

Product maintenance and repair services

Warranty information and claims processing

Replacement part ordering and delivery

Product training and education resources

FAQ:

1. Who are we?

We are based in Guangzhou, China, start from 2018, we are specilizing in all kinds of spare parts for Japanese cars and Korean cars, for example, engine parts, suspension parts,electric parts, steering parts,transmission parts, body parts. . .

2. How can we guarantee quality?

Always a pre-production sample before mass production;

Always final inspection before shipment.

3. Why should you buy from us from other suppliers?

We have experience in spare parts for more than 10+years
